

REMINGTON BRINGS BLISTERING SPEED TO ITS PREMIER® ACCUTIP™ LINE WITH THE ADDITION OF THE NEW 204 RUGER

Madison, NC The best way to improve upon a new cartridge that delivers an amazing 4,225 feet-per-second muzzle velocity is to couple it with a bullet that exhibits match-grade accuracy and rapid, explosive expansion. New for 2005, Remington has added the **204 Ruger** to its line of **Premier AccuTip** ammunition.

The efficient design of the 204 Ruger cartridge achieves this amazing muzzle velocity while consuming less powder than other high-performance cartridges. This results in lower operating pressures and longer barrel life while extending long-range shooting opportunities for varmint hunters. Remington will offer the 204 Ruger loaded with 32 and 40 grain weight bullets.

In varmint calibers, Remington Premier AccuTip ammunition features the AccuTip-V bullet, a precision engineered polymer tipped bullet that is designed for sub minute-of-angle accuracy and explosive expansion. The tip and sleek profile produce an extremely high ballistic coefficient that flattens trajectory and preserves down range energy while the copper jacket is specifically constructed, under a proprietary manufacturing process, to deliver devastating expansion on impact.

Offerings for 2005:

Remington® Premier® AccuTip™ Varmint Calibers

Caliber	Bullet Wt.	Velocity
17 Remington	20 grain	4,250 fps
204 Ruger	32 grain	4,225 fps
204 Ruger	40 grain	3,900 fps
221 Remington Fireball	50 grain	2,995 fps
222 Remington	50 grain	3,140 fps
223 Remington	50 grain	3,300 fps
223 Remington	55 grain	3,240 fps
22-250 Remington	50 grain	3,725 fps
243 Win.	75 grain	3,375 fps
