

REMINGTON ADDS AMERICA'S HOTTEST NEW RIMFIRE CARTRIDGE TO ITS 2005 LINE-UP

Madison, NC – The 17 MACH2™ is taking the rimfire world by storm. Not since the introduction of its big brother, the 17 ITMR™, has the rimfire community expressed such excitement and interest generated by a new product. New for 2005, Remington Premier® 17 MACH2 rimfire ammunition will be offered with an explosive 17 grain AccuTip-V™ bullet and a sizzling muzzle velocity of 2100 fps.

Remington Premier® 17 MACH2 surpasses most standard 22 long rifle cartridge loadings by over 500 fps in velocity, resulting in a trajectory that's nearly seven inches flatter at 150 yards than a standard high-velocity 22 long rifle cartridge. When coupled with the famous AccuTip-V™ bullet, a super accurate, gold polymer-tipped bullet designed for explosive on-game performance, Premier® 17 MACH2 offers a truly high-performance package all in a compact 22 long rifle sized cartridge. Remington Premier® 17 MACH2 also utilizes the Eley priming process that ensures consistent and reliable ignition.

Whether used for precision target shooting or high-volume varmint hunting, the Premier 17 MACH2 will impress you with its lightning speed, flat trajectory, unbelievable accuracy, and best of all, its affordable price.
