

## FIRST KNIFE IN THE REMINGTON OUTDOOR EXPLORATION SERIES" INTRODUCED

**Madison, NC** – Remington Arms Company proudly announces a new collectible series of knives celebrating the exploration of the American wilderness with the use of a compass. Four knives in total, representing the North, South, East and West, in the Remington Outdoor Exploration Series will be offered and each comes packaged in its own handsome four-color display box.

The first in the series is a traditional two-blade trapper representing the **North**. Both the Remington logo and traditional "Remington Country" compass face with the corresponding direction are etched on the clip blade. In addition, a coined "compass" shield is embedded on the genuine pig bone handle of this limited edition knife. The clip blade and the spey blade both measure 3 1/4-inches in length and are constructed of durable stainless steel. The Scotchbrite™ coating on the blades leaves a brushed-look finish. The overall length of the knife measures 7 1/2-inches and when closed, a compact 4 1/4-inches in length.

The **Remington Outdoor Exploration Knife Series** provides collectors with high quality craftsmanship and rugged functionality in knives that celebrate the frontiersman in all of us. The Remington Outdoor Exploration Knife Series is available at your local Remington dealer or log on to [www.remington.com](http://www.remington.com).
