

**SWIFT-LOKT™ ASSISTED OPENING KNIFE IS SLEEK  
ADDITION TO REMINGTON'S LINE OF HIGH PERFORMANCE KNIVES**

**Madison, NC** – Many field situations call for one-hand opening of your knife and Remington has the answer with its new assisted opening knife, "Swift-Lokt", available in two popular blade options for 2005. These well-designed, high quality knives utilize a patented assisted opening mechanism for smooth, reliable operation.

The utility-styled knife blades measure 3 1/8-inches and are constructed of high carbon stainless steel with bead blast finish with choice of a modified drop point or serrated modified drop point; and ambidextrous thumb stud. The easy-gripping handle features rubber inserts and is made from durable, gray anodized aluminum with convenient stainless steel pocket clip with bead blast finish. Overall length of the "Swift-Lokt" knife is 7 5/8-inches with a compact closed length of 4 1/8-inches.

Remington brings its reputation of building traditional, fine quality knives into the 21st century with the new high performance, sleek "Swift-Lokt" Assisted Opening Knife. Visit our web site at [www.remington.com](http://www.remington.com) for a complete listing of Remington's high performance, traditional and collectible knife series.
