

GOLDEN SABER ADDED FEATURES

Extra Steps Are Taken To Enhance This Duty Round's Exceptional Performance.

Golden Saber Additional Features contribute to the reliable performance you demand because lives depend on it. **Nickel-plated cases** help provide reliable feeding, functioning, and extracting/ejecting, while **waterproofed primers and case mouths** provide max integrity in all weather conditions. Primers are triple-checked during manufacturing for reliable ignition. **100% propellant detection** is performed for the cartridge and **100% visual inspection** before packaging. **Flash-suppressed powders** allow faster low light target re-acquisition. Reduced bullet nose diameter allows for precise bore alignment and match-grade accuracy. Optimum barrier penetration and expansion through the full range of accepted barrier tests. Available in 7 Calibers: 380 Auto, 9mm, 357 Sig, 38 Spl., 357 Mag, 40 S&W and 45 Auto.

Brass jacket maintains stiffness and makes radial point swing over a longer distance while mushrooming.

Flash-suppressed powders allow faster target acquisition without revealing the officer's location.

Primer and mouth waterproofing are standard on all loadings.

Jacket is nose out completely through to promote "mushroomability" over a wide range of velocities.

Reduced bullet nose diameter allows for precise bore alignment and match-grade accuracy.

Golden Saber cases are nickel plated for reliable feed, function and extraction.

All Golden Saber primers are triple-checked during manufacturing process.

This series of photos shows the totally controlled and extremely uniform expansion of Golden Saber HPJ bullets.

Golden Saber HPJ (High-Performance Jacket)

Caliber	Index/EDI No.	Range No.	Primer No.	Wt./Grs.	Velocity (ft./sec.)			Energy (ft. lbs.)			Mid-Range Trajectory (inch)	
					Muzzle	25 yds.	50 yds.	Muzzle	25 yds.	50 yds.	25 yds.	50 yds.
357 Mag**	GS267MA	29400	103	125	1225	1162	1036	412	368	325	0.2	0.8
