New Camo Synthetic Offering Added to Model SP-10™ Line-Up

Madison, NC – With its ease of operation, reliability and softer recoil, the Model SP-10 Magnum autoloading shotgun is the most popular gas operated 10-gauge shotgun in America. New for 2005 is a 26-inch version Model SP-10 that is fully camouflaged in one of the newest and most versatile patterns, Mossy Oak® Obsession®, making this hard-hitting autoloader perfect for those demanding hunting situations.

Introduced in 1989, the Model SP-10 Magnum has maintained a strong following among hardcore turkey and waterfowl hunters for its smooth-operating gas system and the ability to deliver a heavy payload at maximum ranges. The gas system is corrosion-resistant and provides softer recoil with a design that involves movement of the cylinder, not the piston, as in traditional gas-operating systems. The addition of the revolutionary R3™ Recoil Pad reduces the punch of this 10-gauge by approximately 30 percent and makes this autoloader more comfortable to shoot.

This 10-gauge, 3 1/2-inch SP-10 features a 26-inch vent rib Rem™ Choke, twin bead sight barrel with Full and Modified tubes included. The rugged, weather-resistant stock is fully covered with Mossy Oak Obsession and has magazine cap stud and rear stud for sling attachment. A durable, padded camo sling completes the package.

The Model SP-10 Magnum Synthetic Camo shotgun is available at a suggested retail price of \$1524.
