

Your attachment did not come through. Your Model 700 was produced in 1976. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

Dear Mr. Alam,

Thank you for your patience. We do not offer any touch-up products, however the following after-market distributor offers a variety of products for the metal finishes

There are small finger like marks on my barrel. It seems like the barrel is losing bluing at certain areas. what should i apply in order to make it look even. i tried the bluing oil but the applied to part looks new er then the rest of the barrel. it gives a strange look
