**Model 11-87P Semi-Automatic Shotgun**

This rugged, gas-operated autoloading shotgun sets the standard for maximum firepower, unquestioned reliability and durability

When fast firing is required, the 11-87's Low Recoil System provides the speed and control needed for heavy buckshot or rifled slug loads during high rate-of-fire situations

In Addition to Standard Features and Options are black, high-strength synthetic stock and fore-end; parkerized finish on metal parts for added durability; blackened bolt, carrier and carrier release for low visibility; and a magazine extension to provide 7 shells

**Note:** For Training and Familiarization, this versatile shotgun also handles a number of lighter loads.

**Remington Model 870 Modular Combat Shotgun (MCST<sup>TM</sup>)**

A "Complete Tactical Shotgun System" in a case that allows an operator to assemble one of three pump shotgun combinations, in seconds and without tools using the REM<sup>®</sup> LOC Quick-Change Stock System, for the tactical situation involved:

- \* Breaching Shotgun - 9 1/2" bbl, pistol grip only, 4 shell capacity
- \* CQB Shotgun - 14" bbl, pistol grip stock, 6 shell capacity
- \* Conventional Shotgun - 18" bbl w/4 choke tubes, pistol grip stock, 7 shell capacity
