

PAGE 12: Model 11-87 Semi-Automatic Shotgun

1. Model 11-87 Semi-automatic 12-Gauge Shotgun – This rugged, gas-operated shotgun sets the standard for *maximum firepower, unquestioned reliability, and durability*.

* *The 11-87's Low Recoil System* provides the speed and control needed for heavy buckshot or rifled slug loads during high rate-of-fire situations.

* *For Training and Familiarization*, this versatile shotgun also *handles lighter loads* (although not intended for use with reduced recoil products).

* *The Factory Installed Magazine Extension* (18" barrel only) helps provide maximum firepower with a total capacity of 7 shells.

* *This Shotgun is "All Business"* in look and feel with rugged, high-strength polypropylene stock and fore-end, non-reflective matte-black finish and blackened bolt and carrier release. Stock and fore-end have molded checkering to help ensure the best grip.

*** **CHART and PICTURES: Model 11-87P** – Show the small chart and four shotguns.

* **USE PICTURE: Officer Using 11-87 Picture** – Officer holding an 11-87 in a firing position. Can use the words cutting-around the pictures or as background.

*** **STATEMENT: Place at Bottom of Page: Optional Insignia and Property Marks** – On both the Model 870 and Model 11-87 shotguns, letters or numerals (or combinations) can be engraved on receiver, at a nominal charge. Simple property marks or insignia, up to 1 1/4" square, can also be engraved on receivers for orders of 25 guns or more. You furnish the design, we'll adapt it for engraving.

PAGE 13: 12-GAUGE DUTY BUCKSHOT SHELLS

1. LE 12-Gauge Duty, Training, and Qualification Shells – Matched up with our selection of law enforcement 870 Pump and 11-87 Semi-automatic Shotguns is a broad line of law enforcement 12-gauge shells for all applications: full-power Express® buckshot and Slugger® rifled slugs, reduced recoil loadings, and target loads. Everything is conceived and designed to meet law enforcement's critical demands whatever the duty or training situation. Our law enforcement shotshells provide the reliability, consistent performance, and stopping power you need when a shotgun comes out of the rack.
