

Recoil pads for the Model 700 are not fitted they are flat. Butt plates for the Model 700 are fitted. Recoil pads must be cut to fit the stock (wooden stocks). We do not recommend that consumers attempt this work themselves, we recommend an RARC or competent gunsmith to perform this service. (If they mess up their stock during this process it is not covered by warranty.) (Fitting a recoil pad voids the warranty on the stock only, not the entire firearm) If a gun is a magnum, it gets a recoil pad. Standard long action or short actions get a butt plate.

Remington® R3™ Recoil Pad

Finally, there's a recoil pad that truly tames the hard-recoiling "punch" of today's high-powered magnum rifles and shotguns. In fact, our new Remington R3 Recoil Pad is so effective that it relieves recoil **over 30% better** than conventional recoil pads.

Utilizing a 3-step process designed by LimbSaver™, the Remington R3 allows for faster target acquisition during multiple follow-up shots.

Step 1. ABSORBS vibration.

The R3 is constructed from Limbsaver's™ proprietary NAVCOM™ (Noise And Vibration Control Material) to ABSORB shock and reduce vibration.

Step 2. REDIRECTS energy.

Specially designed internal "mushrooms" REDIRECT the recoil energy outward instead of straight back into the shooter's shoulder.

Step 3. COMPRESSES under recoil.

Internal air chambers allow the pad to COMPRESS under recoil, acting as a shock absorber. This turns the "punch" of recoil into a "push".

Simply put, less felt recoil equals more comfortable, more enjoyable shooting on the range and in the field.

Fits most **Remington synthetic stocks** for the following models:

RIFLES

Model 700 ADL
Model 700 BDL
Model 700 LV-SF
Model 700 ML
Model 710
Model 7600

SHOTGUNS

Model 870 (12 & 16-ga)
Model 1100 (12 & 16-ga)
Model 11-87
Model SP-10
