Model 700

The Model 700 was introduced in 1962 and is still in production at the present time. This rifle has the reputation of being the most accurate out of the box rifle on the market. The Model 700 is a bolt action push feed rifle.

The Model 700 was conceived in the late 50's and was on the market in 1962. It quickly became the standard for production firearms. We were the first to do production guns in an assembly line. Prior to this all guns were done one at a time by hand.

Prior to the introduction of the Model 700 we had several bolt action guns. The Model 600, 660, and the 625 were the predecessors. These were all very accurate and reliable, but the Model 700 was designed
