John,

There are never too many Johns. Thanks for reminding me about the fire control. I will make sure we find an optimum fire control. Thanks John

John Mroz,

First of all, there are way too many guys named John.

Please make sure the M870 fire control is at the lower end of the range since it is going to be shot more like a rifle than a shotgun. It is the same deal here; they will poke us in the eye if the trigger weight or travel is what they consider excessive.

Thank you,

John Fink

John Mroz,

Please coordinate this with Chris Shoemaker and Jon Waldo.

Steve P.
