Phillip,

Let's check trigger pull, engagement, take down screw torque, retorque to Mayfield torque specs. and then mark screws for backout. Then it's follow the Test Plan for Jack Fcn, Shoulder, Endurance on the 30. Other 6 will be for a redo of SAAMI Jar-Off, Rotation & Drop. Need to set these to .025" engagement and 4.5 lbs. trigger pull. Let me discuss this with Trull at the SHOT Show before you do the drops however.

Scott
