 Subject: RE: Draft of EET test request for M710 CA DOJ bolt plug

Brad,
 I reviewed this with Dale and we both agree that we need to do the drop tests.

 > Hi Scotty,
 >
 > Matt had asked me earlier if it made sense to drop test guns which had the new MIM bolt plugs installed. Would there might be any difference as compared to the plastic bolt plugs? I can't say with 100% certainty...so I thought it would be prudent to include some type of drop testing in the DAT plan. We'd hate to discover a drop problem after placing an order for the MIM tooling. With this background, how do you feel about step 7 in the test plan...do we need to scale back? Or do you feel reasonably confident it can be omitted?
