**Subject:** Action Item #1, 700 F.C. Issues

The following list has been developed to capture the majority of Fire Control "related" rejects, experienced by our builders, in the assembly of bolt action rifles. The first seven (7) will capture the majority of rejects, with the eight one, to be used in unusual circumstances. The codes and corresponding numbers are as follows:

- 1 Light Trigger Pull
- 2 Heavy Trigger Pull
- 3 Trigger Creep
- 4 Dead Safe
- 5 Bent Safety Arm
- 6 Loose/Hard Safe
- 7 Wrong Safety
- 8 Other (Specify Malfunction)

We will start using these codes as engineering O.K.'s. Gene.
