Subject: RE: M/710 T & P Issues
Importance: High

One more topic to add to the list.

1. • ✓ ISS System - could move ISS from "On" to "Off" with a screw driver (1 gun), *detent sticking, sometimes works, sometimes doesn't,*

Subject: M/710 T & P Issues
Importance: High

The following topics will be discussed in detail during the 4:00 pm conference call today.

- ✓ Trigger Pull - Toward high side of spec. *3 just out, but not enough to worry about*
- ✓ Engagement High - As measured by E-town, different methods *9% projected out on high side*
(need to understand further) *1st screw deforming trigger? Gate location? (close)*
- ✓ * Grip Caps - Falling out during shooting *(2) of 14 Guns at varying rds., 67 rds.*
- ✓ Scope Issues -
 - 1. ✓ Fuzzy optics on some scopes *1/10 Bushnell (.925) lbs. w/ rings*
 - 2. ✓ Crosshairs rotated approx. 30 deg. on 1 scope *Swampski (.965) lbs. "*
- ✓ * Box bottoms - Falling off during shooting *(3) at 62 rds., 322, 470*
- ✓ Magazine followers - Sticking in box (cause of stem low malfunction) *(3) ± 100rd level*
- ✓ Safety in Fire Position as received - 1 of 30
- ✓ "Pillar bedding" on hang tag - *should be removed*
- ✓ Box removal difficult - varies *w/ rds., more rds., more de for.*
- ✓ Bolt Stops Loose - detent force varies
- ✓ Trigger position relative to trigger guard - side to side
- ✓ Take down screws - loosening during shooting
- ✓ Scope rail deformation - *Swampski scope a major factor (2X wt. of Bushnell)*
Wrist than DAT but 2

The topics in red are classified as potential show stoppers. These effect function and short term customer perception. We will discuss all topics in more detail at 4:00 today.

- INDENT Aug .0175" (Saami Min(.0177) 4/29 out
- Box fell down 3 times on 1 gun (was it fully latched?)

367C, Dale to call Al for conf
