Subject: 710 Mag testing

Gary, The physical measurement and metallurgical evaluation will be complete in a couple of days. As to the strain gage measurement testing, Scott Franz is heading this up. I know that the Test Lab Request is in to the Lab and will be completed as soon and resources will be available. Additionally questions regarding this should be directed to Scott Franz. Jim

Jim,

Could you please give me a schedule of when I can expect to see the data on the rifling of the two .300 Win Mag guns I sent you.

Gary Riley
