Importance: High

Phillip,

As per the conf. call yesterday let's check engagement on all guns that have completed the shooting phase of testing. This is an additional measurement that is not in the test plan. See me if you have any questions. As soon as we identify a "fuzzy" scope we need to send it along with the rotated crosshair scope to Al Russo in Madison. Also need to ship the 710 identified as the worst case trigger position sample to Matt G. (Tag as to what this is and send to Matt's attention). I know you've been busy. Just a reminder to do these when you can.

Thanks,
Scott
