Subject: M/710 barrel issues

Jay and I spoke regarding the barrel issues indicated in my letter. The proposed barrel contour is acceptable. The barrel length proposal is less than appealing to Jay. He would like to have 22" Long action and 24" Magnum barrel configurations, but if there is a sizeable cap. investment to provide a reliable process, Jay is willing to review it further. We discussed whether we could sell a 22" magnum barrel, Jay did not know but said he would investigate the possibility. The cost estimates should be generated around a 22/24 offering, with a potential cost/cap. reduction for a common 22" barrel offering.

Mike
