Subject: M/710 package

Joe/Mike,

I received Mike's voice mail indicating the barrels are on their way, good job, Thanks!!

I shipped another drawing package today, should be there monday, it will include the following:

Partslist Dated 3/12/99  
New Drawing Bolt Plug (assy) C-300368  
New Drawing Brazing Shim B-300366  
Revised Drawing Ejector B-300342 Rev. 1  
Revised Drawing Bolt Handle Pin A-300329 Rev. 1  
Revised Drawing Bolt Head E-300338 Rev. 4

Also included are two rapid prototype Bolt plugs. (1) of the "smallest" configuration and (1) of the "largest/worst case" configuration (tagged). Per the notice of 3/11/99, build the mold to the smallest configuration (as detailed in dwg C-300368) and ensure that the cavity/cavities could be enlarged to the "largest" configuration if required.

Have received a magazine prototype that functions properly hand loading/unloading. Detailed drawings of this magazine, magazine follower, and magazine bottom will be completed by 3/19/99. For EET and DAT of the magazine assembly, the magazine boxes will be ordered through the prototyping shop, with followers and bottoms supplied via rapid prototyping. Use the drawings to begin production development, but do not initiate tool build until EET performance evaluation is complete.
