I had very little involvement. Misc. emails from 1999/2000 time period regarding material selection and HT issues - although Jim U. was the primary contact all these. I did some work around the CA DOJ certification in 6/2002 and steel specifications for Metty in 1/2005. The following is a list of the files and issues that I worked on (reports):

Magazine Box Weld Analysis	09/13/2000
Magazine Box Weld Analysis 2	09/19/2000
Sear Safety Cam Evaluation	05/31/2000
Laser Engraving Analysis	09/27/2000
Bolt Stop Failure Analysis	10/31/2000
Bbl Induction Heat Treat Analysis	06/27/2000
710 Magnum Bbl Failure Analysis	09/29/2003

That's all I have.

Marlin.

If any of you have worked on any aspect of the M/710 program and as a result have either e-mails or local files (CAD, test data, etc.) let me know.

Thanks

Scott
