Subject: FW: 710 Short Action Meeting Notes

Gerald,

Will brings up a good point about the writers seminar. We'll need to incorporate if possible. Please keep this in mind as we move forward on this project.

Thanks Kevin. I concur with your notes.

I'm sure Marketing would like to see the Time-line include M710 SA samples for the Writers Seminar in October since the current plan has the M710 SA build after Nov. 1st. Writer Seminar Guns would require M710 SA (either FC) shot, fine-tuned and shipped to Madison by the 1st of October. This could be done, since we do have a prototype stamping tool for the magazine but not follower, box bottom and spacer which is an eight week tool.
