Subject: 710 Dry Cycle Report-Shorter Safety Pivot Pin

Attached is a report from Brian Rages summarizing results of a dry cycle test run to qualify the shorter safety pivot pin for the M/710. As per our agreement a single sample was tested by dry cycling the action to the 2,000 cycle level. Results from the test were positive. Mike Keeney will follow up with a formal transmittal of the shorter pin. If anyone has any questions please feel free to give Brian or myself a call.
