#### CONFIDENTIAL

# Remington Arms Company (1996) RESEARCH & DEVELOPMENT TECHNICAL CENTER 315 WEST RING ROAD EUZABETHTOWN, KY 42701

- Lower the gauge until it just touches the magazine follower, approximately in the middle location both side to side and front to rear.
- Zero force gauge again if necessary.
- Lower the gauge 0.200" and take the spring force measurements.
- Lower the gauge another 1.0".
- Take the force measurement at this depressed location of the spring.
- Repeat procedure two additional trials for each box
- Average the 3 trials for each box and at each measurement location.

### Data Required:

- Force Measurements taken on each trial per box at each of the measurement locations.
- The Average Force measurement per box
- The serial number of the Chatillion Digital Force Gauge used for the procedure.

## TLW0300N - Measure Firing Pin Head / Sear Engagement:

The vertical engagement of the contact between the firing pin head and sear will be measured. The minimum vertical engagement to be .049".

#### Method:

- Use digital height gauge and one-tenth dial indicator attachment.
- · Visually check to ensure the firearm is unloaded.
- Clamp firearm in portable vise and set on top of granite table.
- Remove the bolt assembly,
- Place the safety in the "Fire" position.
- Use a small bubble level to level the top of the receiver relative to the granite table.
- · Zero indicator on the receiver insert just rearward of the sear.
