Subject: 710 testing

Assuming that we get beyond the drop testing and we start the endurance testing. The 3 guns for endurance are B1, B2, B3. We received 2 bolt assy. today, the firing pin head were the old type. I installed the 2 bolts in the guns and proofed them using the old style firing pin heads and then removed the firing pin assy. To start endurance we will need to use one complete bolt assy from one of the drop guns in B3 or use a complete drop gun and firing pin assy from 2 of the drop guns for B1 and B2. The new bolt heads & bolt bodies are still in B1 & B2.
