Phillip,

Hold all 10 guns for now until we run this test. As in T&P, let's only drop 6. Don't know if I clearly stated how many to drop in the work request. See me if you have any questions.

Scott

>The intent of this test is to approve the M710 .30-06 sighted gun for shipment. All other drop testing is done with six guns. I would adhere to standard testing procedures. If any other testing has to be done to clear the sighted version for shipment, include that in the testing. If 4 of the guns are not needed, ship them back.
