Dear Customer:

The services that have been performed on your product are explained below.

- X **Mechanical Inspection** To insure total travel for windage and elevation adjustment in your scope, we use a calibration instrument called a "Collimator." The windage and elevation adjustments were completely cycled and we have verified that they have total travel. A specialist in our service department has checked your scope for image jump and drift, loss of motion, parallax, and image quality. All tests show your scope is mechanically sound.
- Complete Internal Inspection** To return your scope to an "as new" condition, a specialist in our service department has removed all internal parts. The specialist has checked cam followers, screws, lens and pivot tube slots. After careful inspection your scope has been reassembled to an as new condition.
- X **Visual Inspection** Our experienced specialist has carefully inspected your scope for any irregularities inside and outside. This inspection includes a thorough lens inspection. Your scope was found to be completely sound and functional.

Yours truly,

L&S Technical Service Specialist

DA FORM 5504, SEP 88

Block 24 continuance, ref: M24 SWS CG225064

1. bolt catch spring broken

2. request

- complete services
- bench test firing depth and spread tolerances
- estimate remaining barrel life
- inspect bore
- calibrate M3A Scope
- inspect locking mechanism and bolt face
- inspect all factory tolerances
- inspect components for hairline cracks and deficiencies due to extreme environmental conditions (southwest asia) and operator abuse

Centroidal distance calculations for Rifle # C6225064

2 Mar 1998

THE AVERAGE X-COORDINATE FOR THIS RIFLE IS: -.1928

THE AVERAGE Y-COORDINATE FOR THIS RIFLE IS: 1.068

THE RESULTING AVERAGE POI RADIUS FOR THIS RIFLE IS: 1.08526

THE AMR FOR THIS RIFLE IS: 1.209

CENTROIDAL DISTANCES

0 TO	1	.674212
