

Remington continues their partnership with the Rocky Mountain Elk Foundation in 2005 with the fifth commemorative Model 700™ RMEF series rifle chambered in 7mm Remington Magnum. Built to handle the most-daunting terrain and weather conditions, the Model 700 XCR (Xtreme Conditions Rifle) RMEF Camo rifle features our latest cutting edge rifle design and technology.

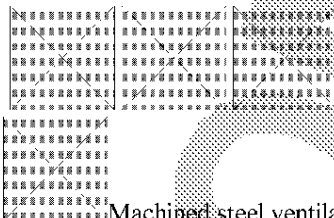

The stainless steel barreled action of this limited edition rifle uses our proprietary new TriNyte™ Corrosion Control System to produce a finish that provides scratch and corrosion resistance far superior to stainless steel alone and better than any other gun on the market. And for added protection against the elements, the fire control components of this Model 700 are nickel plated.

The high tech synthetic stock covered in Realtree® Hardwoods® HD™ camouflage features the recoil reducing R3™ recoil pad and a unique, patented technology from Hogue that incorporates easy-gripping, overmolded rubber panels into the grip and fore-end areas for a sure grip under any conditions. Other features include a clean 26-inch magnum barrel, a receiver drilled and tapped for scope mounts, a hinged floor plate engraved with the RMEF logo, and sling swivel studs.

This Model 700 XCR RMEF Camo rifle will only be available in limited quantities for one year. A portion of each sale generated from this rifle will be donated to RMEF to support their conservation efforts.

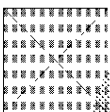

Previous Editions:
