2005 NEW PRODUCTS - RIFLES

- Model Seven AWR
- Model 504 Custom C-Grade
- Model 504-T LS Heavy Barrel

MODEL 700

History

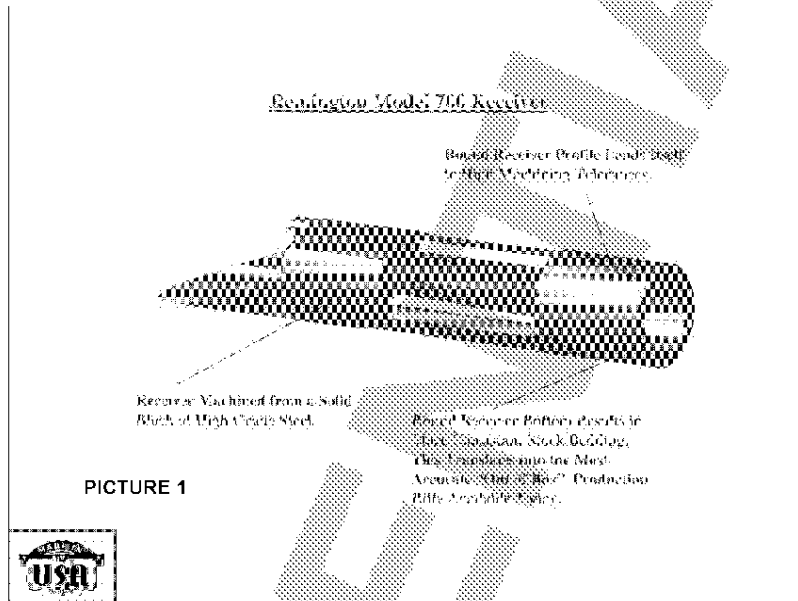

- Introduced 1962
- The best selling bolt-action rifle of all time
- Over 4.5 million produced to date
- More custom bolt-action rifles have been built on 700 actions than all others combined
- The standard by which all other bolt action centerfire rifles are judged.

What Makes the Model 700 Great?

- Receivers are machined from solid bar stock which makes them uniformly strong and consistent. (see Picture 1)
- Receivers are cylindrical which results in more consistent bedding in the stock for consistent shot placement. (see Picture 1)

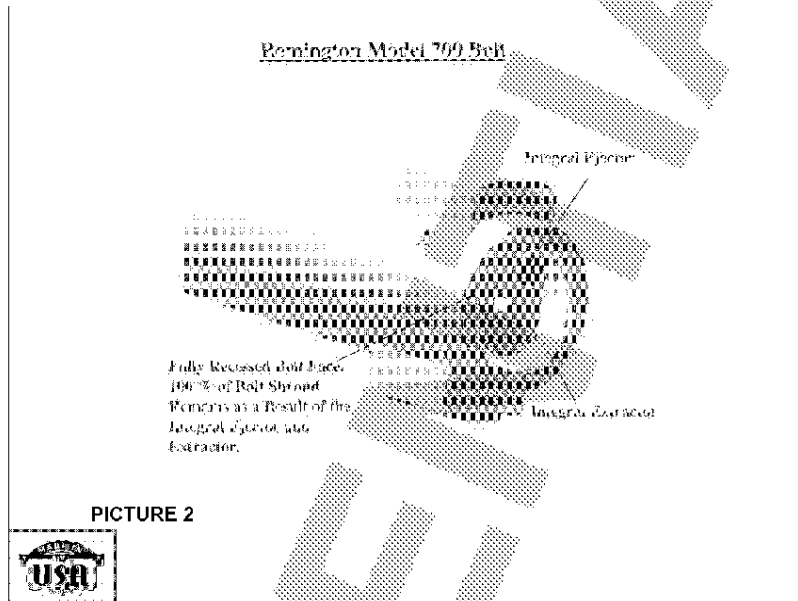

What Makes the Model 700 Great?

- Receivers are machined from solid bar stock which makes them uniformly strong and consistent. (see Picture 1)
- Receivers are cylindrical which results in more consistent bedding in the stock for consistent shot placement. (see Picture 1)
- The extractor is set in a groove inside the rim of the bolt face. Thus, *unlike* the Mauser claw (controlled round feed), the cartridge head is uniformly supported. (see Picture 2)

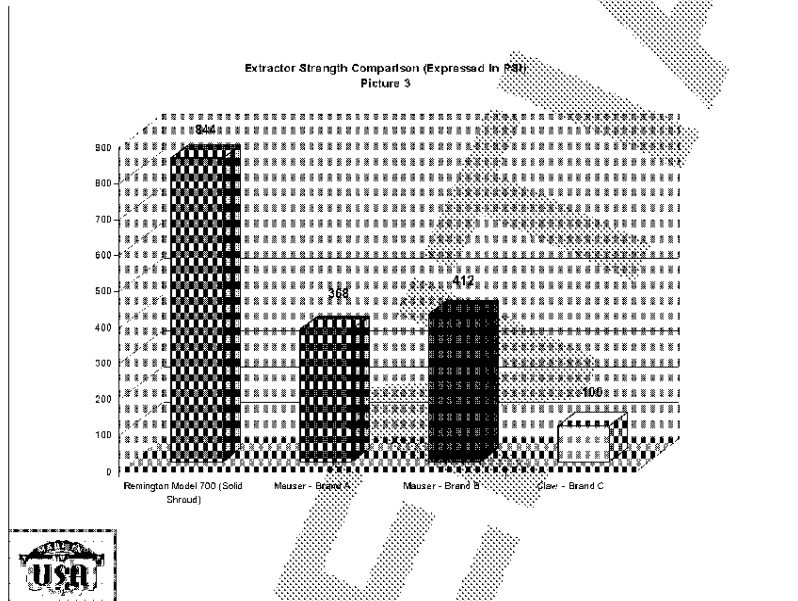

What Makes the Model 700 Great?

- Receivers are machined from solid bar stock which makes them uniformly strong and consistent. (see Picture 1)
- Receivers are cylindrical which results in more consistent bedding in the stock for consistent shot placement. (see Picture 1)
- The extractor is set in a groove inside the rim of the bolt face. Thus, unlike the Mauser claw (controlled round feed) the cartridge head is uniformly supported. (see Picture 2)
- Model 700 extractor is the strongest commercial design (see Picture 3)

What Makes the Model 700 Great?

- **"Three Rings of Steel"** (See Picture 4)

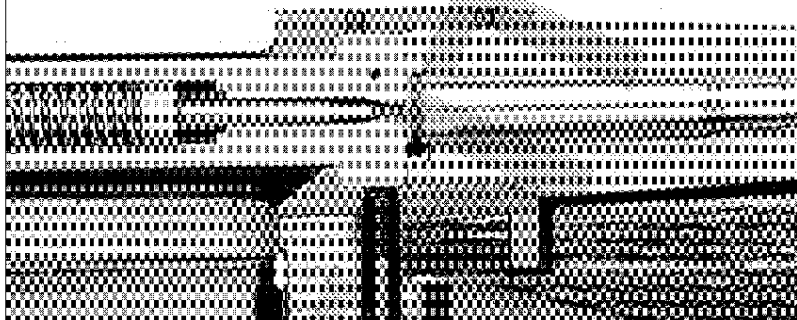

1. Cartridge head is enclosed by the recessed bolt face
2. Bolt face locks up inside the counter-bored breech of the barrel
3. Barrel breech is surrounded by the receiver

**The Result is Unparalleled Strength
Exhibited by the Remington Action!**

(Note: Three Rings of Steel Applies to Model Seven,
Model 673, and Model 710)

700 CUTAWAY – 3 RINGS OF STEEL

What Makes the Model 700 Great?

- 3 Millisecond Lock-Time (Time from which the trigger is pulled to when the firing pin strikes the cartridge) is fastest of any production trigger available
- The Model 700 features a push-feed action, meaning the bolt pushes, rather than carries the cartridge into the chamber

Push Feed vs. Controlled Round Feed "The Myth Exposed"

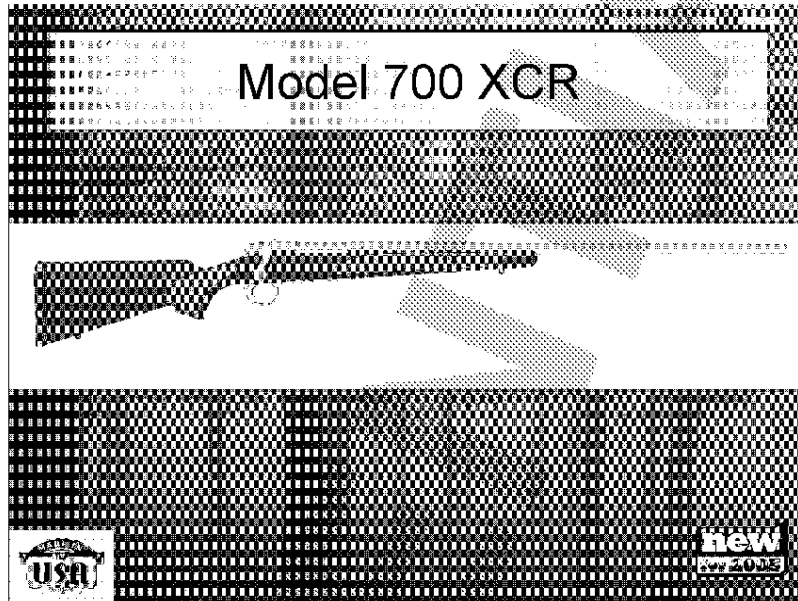

- Controlled Round Feed is more positive in perception only.
- The claw extractor in controlled round feed actions generally will not override the cartridge head, therefore rounds must be inserted in the magazine.
- Push feed actions are stronger providing better cartridge alignment and support for a more accurate system.

What Makes the Model 700 "The Most Accurate Out-of-the-box Rifle"

- Production Uniformity
- Simplicity in design
- Great factory trigger – Fast Lock-time
- Superior Strength – Three Rings of Steel
- Action has a great deal of mass, producing rigidity for accuracy
- Remington's GFM barrel forging process is second to none

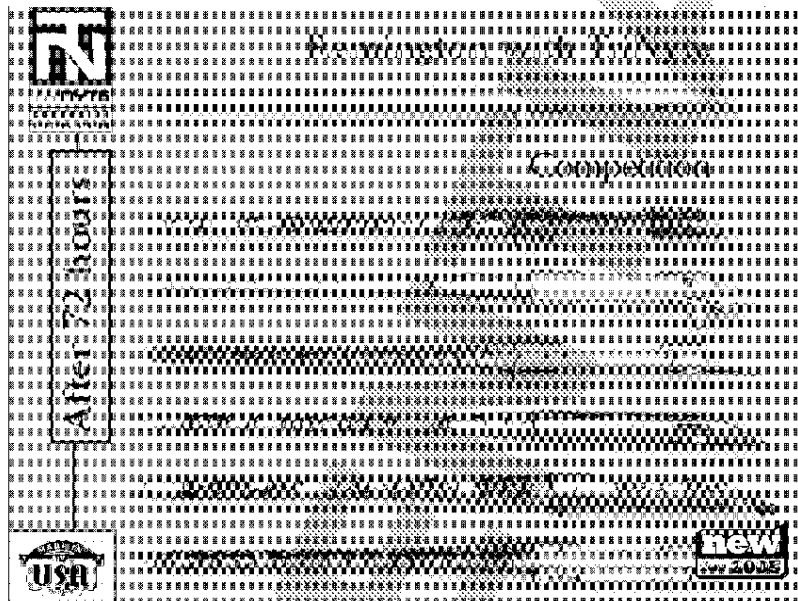

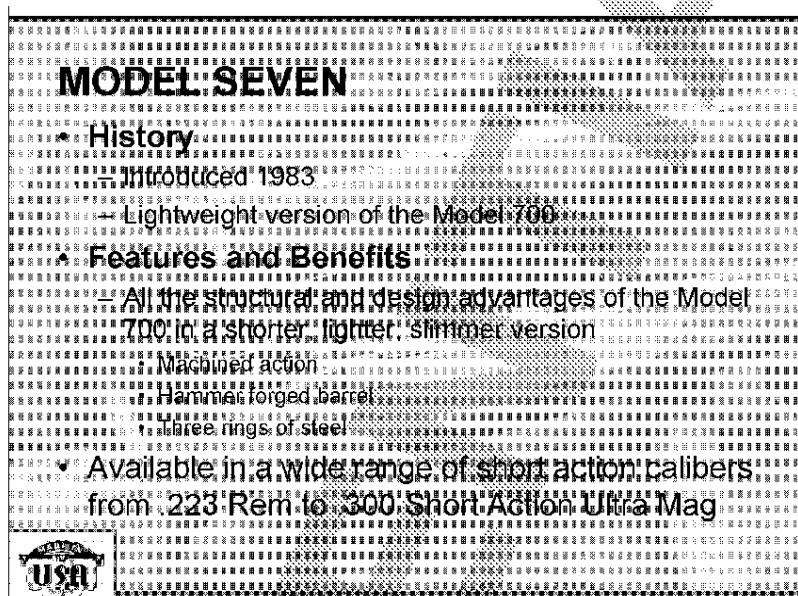

Model 700 XCR

- **Xtreme Conditions Rifle**
- New proprietary TriNyte Corrosion Control System
- Virtually impervious to the most extreme conditions
- Proven corrosion-fighting materials and an innovative, state-of-the-art application process
- Scratch and corrosion resistance far superior to stainless steel alone
- The MOST corrosion resistant gun on the market!
- Patented rubber over-molding process on a new ergonomically designed synthetic stock
- Revolutionary R3 Recoil Pad for 40% recoil reduction
- The new standard in rugged durability!

MODEL 673 GUIDE RIFLE

History
 Modern version of the popular Model 600 Magnum series.
 Designed to be a fast-handling, powerful, "guide" rifle.

Features and Benefits
 Based on the venerable Model Seven action.
 Machined steel ventilated rib with iron sights for fast target acquisition.
 High strength, weather-resistant wood laminate stock with stylish light and dark stripes, reminiscent of the original Model 650 stock.
 22-inch magnum contour barrel.

Available in 300 SAUM, 350 Rem. Mag., 6.5 Rem. Mag. and 308 Win.

MODEL 710

- **History**
 - Why build it?
 - Why sell it?
 - Developed by our R&D facility and produced in our Mayfield, KY factory.
- **Features and Benefits**
 - 3 bolt lugs lock directly into the barrel.
 - Barrel hydraulically pressed into receiver.
 - Button lifted barrel.
 - 2005 receivers are extruded steel.
 - Standard long action and magnum calibers for most medium to large North American game.
 - The best rifle on the market for beginning shooters and hunters.

MODEL 7400

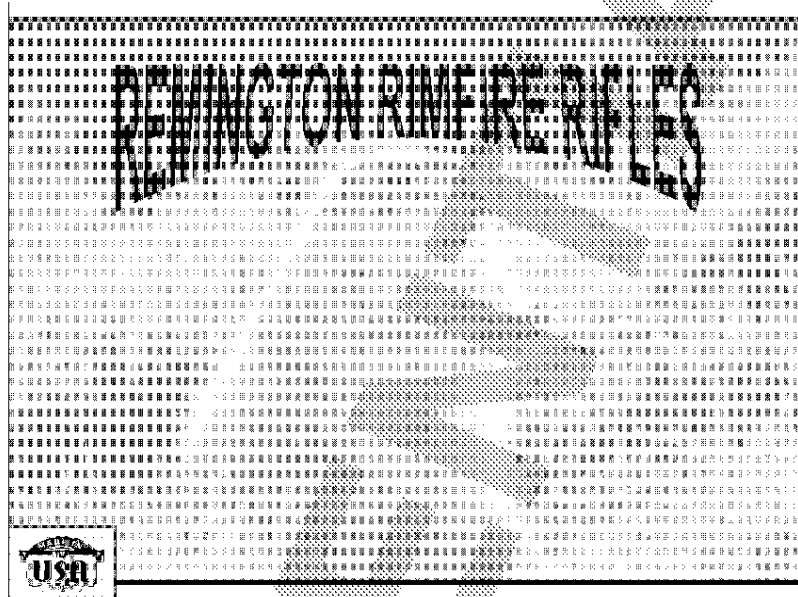

- **History**
 - Introduced in 1980
 - Descendant of the 740, introduced in 1955
- **Features and Benefits**
 - Machined steel receiver
 - Consistent, accurate, and reliable in situations where rapid follow-up shots are necessary
 - 7400 has softest recoil of any auto-loading rifle on the market
- **FAQ's**
 - Will it cycle reduced recoil ammunition?
- **Maintenance Considerations**

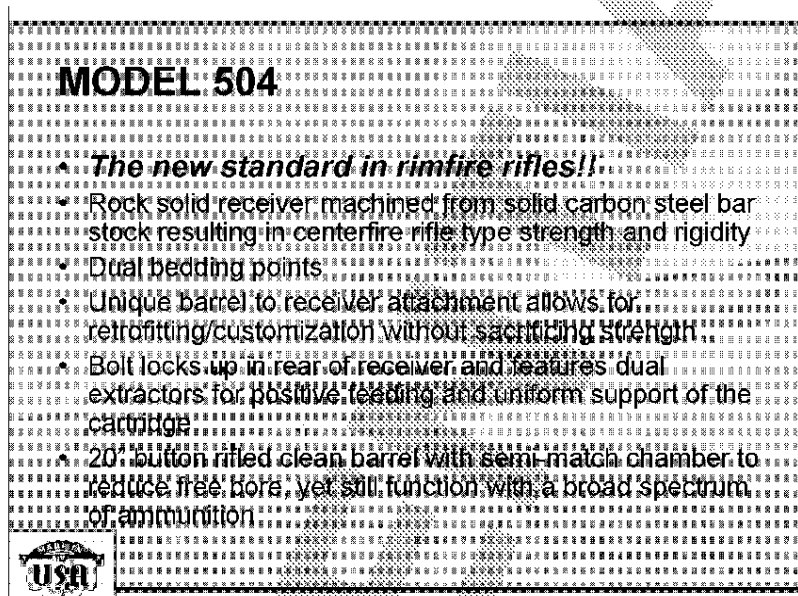

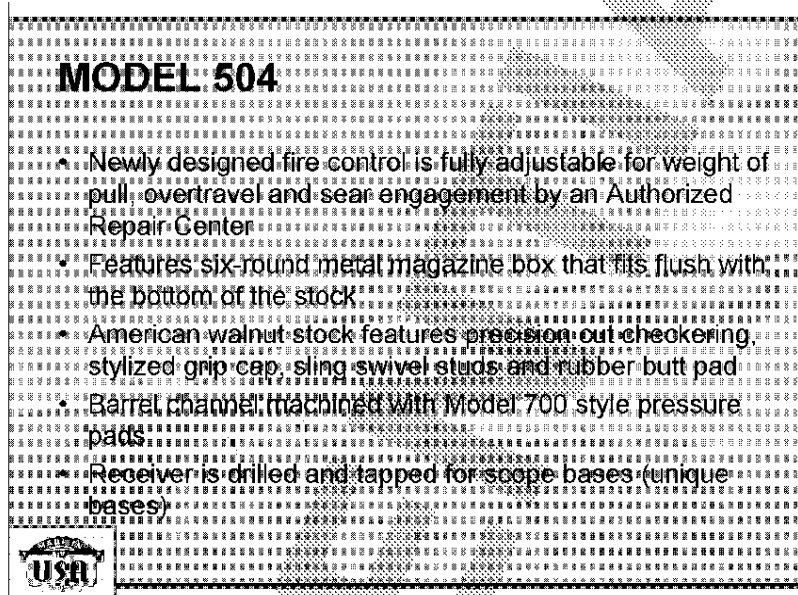

MODEL 7600

- **History**
 - Introduced in 1980
 - Descendant of the 760. Introduced in 1955
- **Features and Benefits**
 - Machined steel receiver
 - Consistent, accurate, and reliable in situations where rapid follow-up shots are necessary
 - The Model 7600 is the most reliable pump action rifle on the market... a centerfire 870?

MODEL 504

- Newly designed fire control is fully adjustable for weight of pull, overtravel and sear engagement by an Authorized Repair Center
- Features six-round metal magazine box that fits flush with the bottom of the stock
- American walnut stock features precision cut checkering, stylized grip cap, sling swivel studs and rubber butt pad
- Barrel channel machined with Model 700 style pressure pads
- Receiver is drilled and tapped for scope bases (unique bases)

MODEL 504 – Fire Control

- New design specific to this model

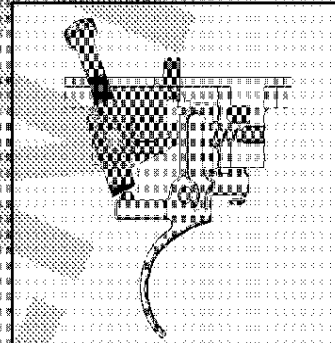

- Fully adjustable for overtravel, pull weight, and engagement by Authorized Repair Centers

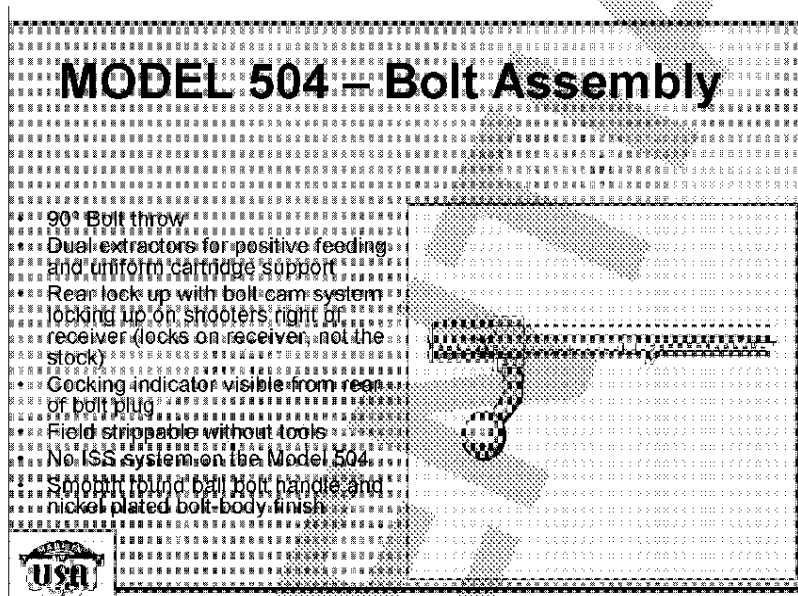

- Engagement adjustment screw designed to limit minimum sear engagement

- Two position Safety

- Safety positively returns the trigger under the sear when moved from fire to safe

- Trigger pull weight from factory set at 4.0 lbs nominal

MODEL 504 - Receiver

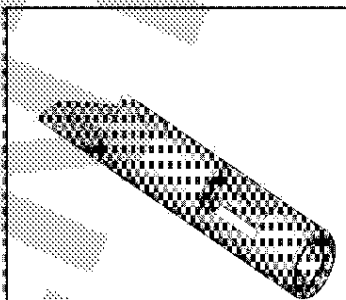

Receiver machined from solid carbon steel bar stock, drilled and tapped for bases (unique bases)

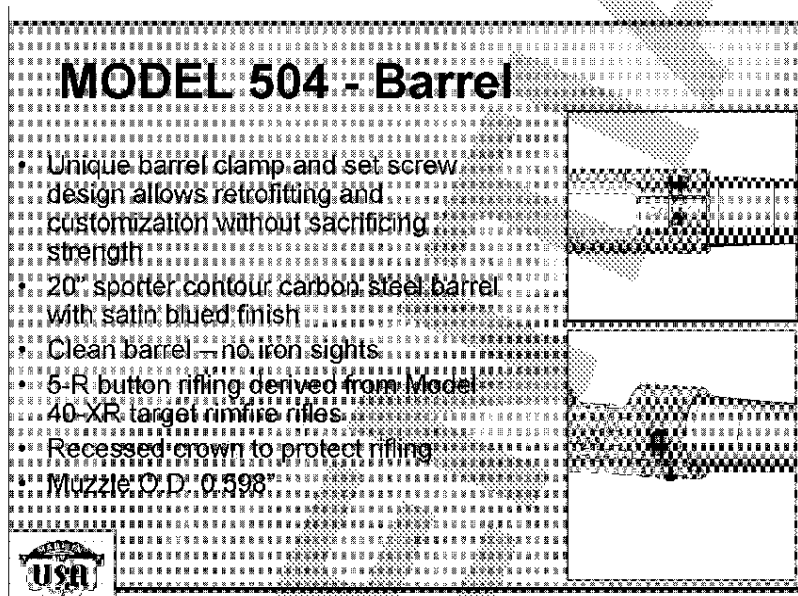

Dual bedding points for stable seating and alignment in stock

Beery design results in centerfire rifle type strength and rigidity to 300" nominal wall thickness

Current receiver scalable up to magnum rifle cartridges

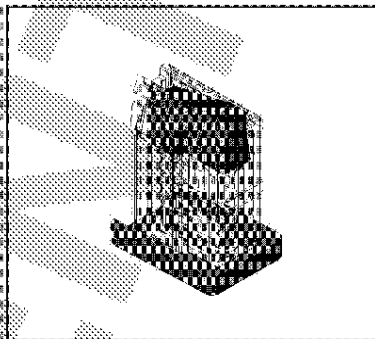

Base receiver design lends itself to customization for competitive shooting

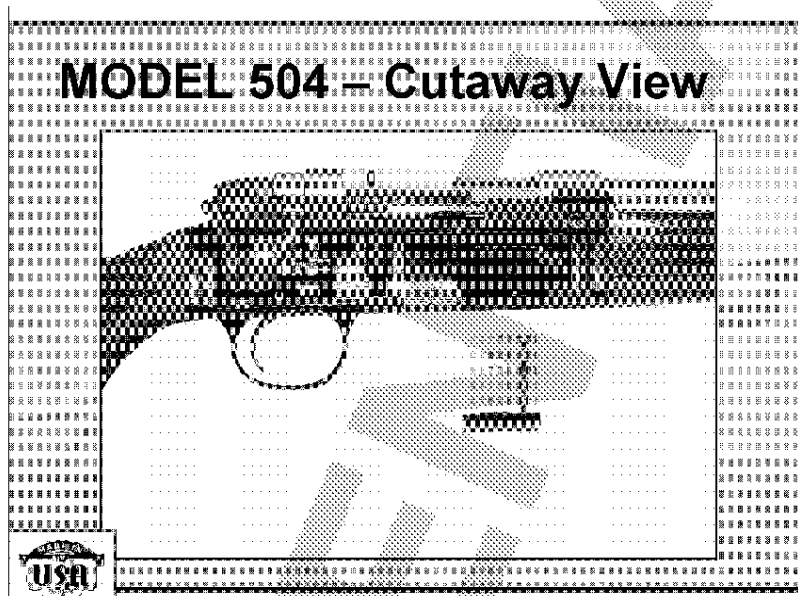

MODEL 504 – Magazine Box

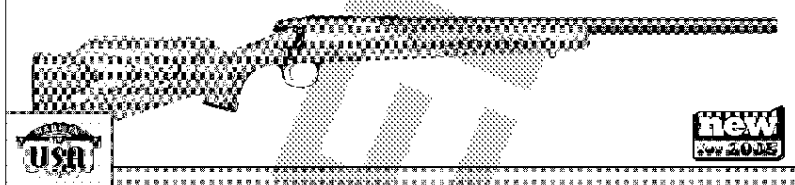

- 8-shot metal detachable magazine box
- Staggered stack design
- Flush mount with bottom of stock
- Spring loaded magazine release for easy removal
- Easily disassembled for cleaning

MODEL 504-T LS HB

- Free-floating, 20 inch heavy target barrel (0.90" O.D.)
- Brown laminate Monte Carlo stock
- Easy Match chamber in the .22 LR
- Pinpoint accuracy with match grade ammunition
- Available in .22 LR and .17 HMR

Model 504 Custom C Grade

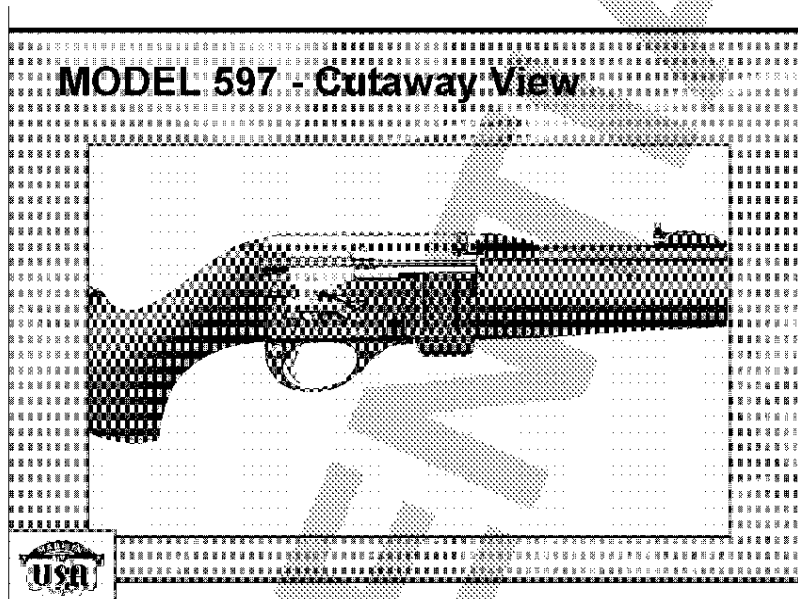

- Hand built and tuned in the Remington Custom Shop
- Hand crafted .24 inch Model 40-X barrel, match chamber
- 5-R Button Rifling with concave target crown
- C-Grade, fancy American Walnut stock
- Stocks are hand fitted and epoxy bedded
- Rosewood fore-end tip
- High polished blued finish on all metal surfaces

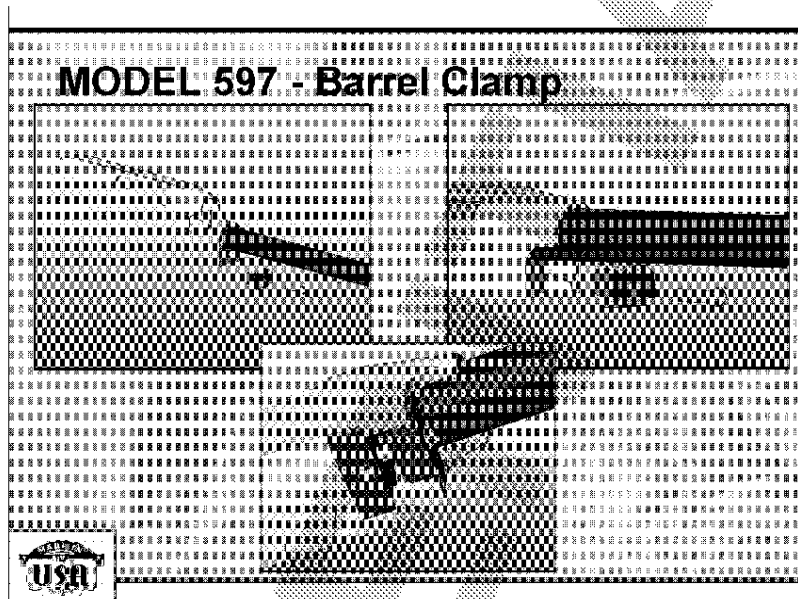

MODEL 597

- **History**
 - Designed by our industry leading R&D facility in Elizabethtown, KY
 - The first firearm produced by our Mayfield, KY factory
- **Features and Benefits**
 - Dual bolt guide rails
 - Button loaded barrel
 - Proprietary barrel clamp system
- **Available in .22 LR, .22 WMR, and .17 HMR**
 - The only .17 HMR autoloader on the market

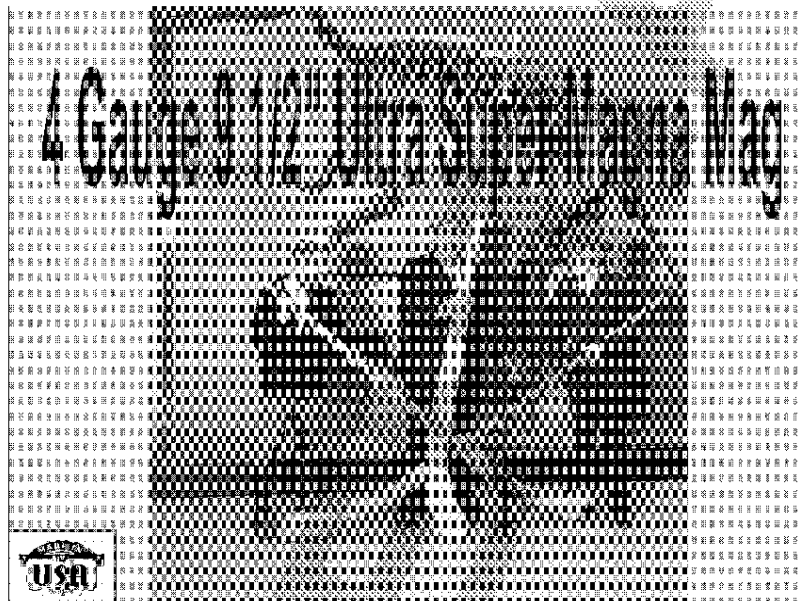

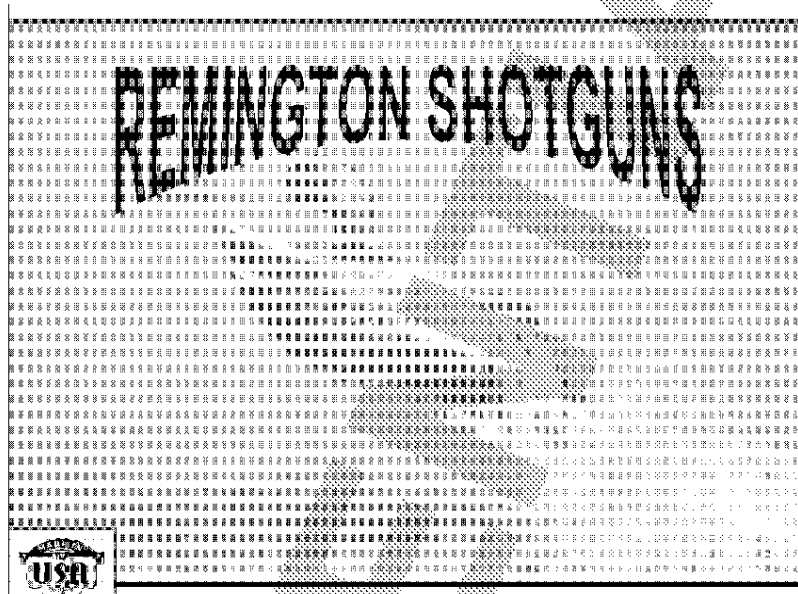

2005 NEW PRODUCTS - SHOTGUNS

- Model SP-10™ Magnum Camo (Mossy Oak® Obsession®)
- Model 11-87™ Sportsman® (12 & 20)
- Model 11-87™ Sportsman® Deer
- Model 11-87™ Sportsman® Youth
- Model 11-87™ SPS-T™ Super Magnum™ NWTF Edition
- Model 870™ Express® Jr. NWTF Edition
- Model 870™ Express® Super Magnum™ Fall Flight
- Model 870™ SPS-T™ Camo Thumbhole
- Model 870™ Wingmaster® Dale Earnhardt Tribute
- Model 870™ Wingmaster® Jr.

MODEL 870

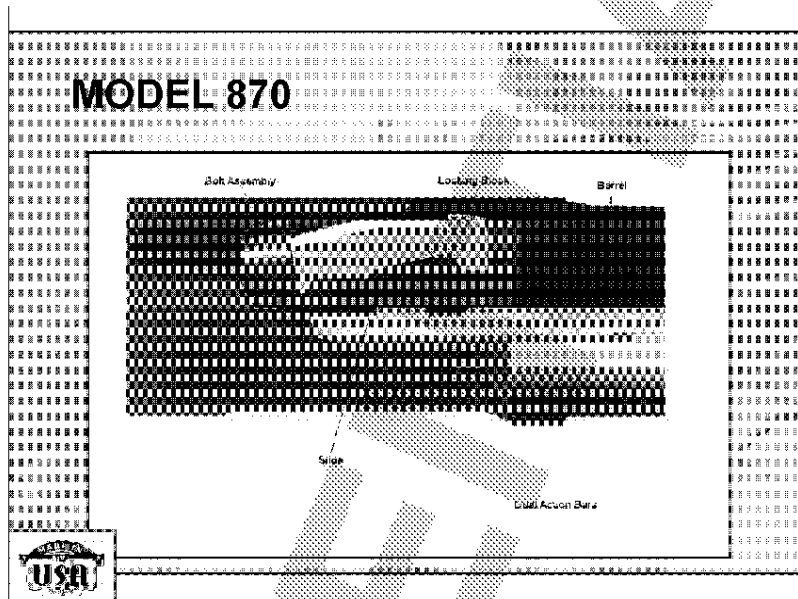

History

- Introduced in 1950
- Best selling firearm in history (nearly 9 million produced so far)
- The standard by which all other pump shotguns are judged!*

Features and Benefits

- Receiver machined from a solid block of steel
- Available in 12 gauge, 20 gauge, 28 gauge, 30.06 and 410
- Multiple safety features built in
- The ultimate in reliability
- Wingmaster/5R vs. Express
- A gun for all occasions

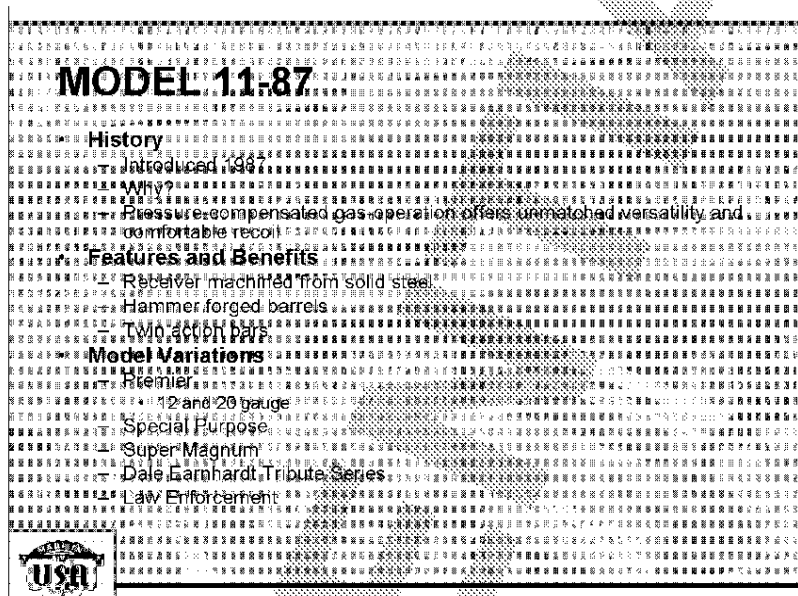

MODEL 1100

History
 Introduced in 1960
 First successful production line gas operated autoloader ever produced
 Over 4 million produced to date
The standard by which all other auto-loading shotguns are judged.

Features and Benefits
 Receiver machined from solid steel
 Hammer forged barrels
 Very similar to the 410 in design and function
 The lowest felt recoil of any autoloading shotgun on the market

Variations:
 Target versions available for competition from 3 Gun to Sporting Clay
 Hunting versions available for a wide range of game from squirrels to Waterfowl to turkey
 Youth models also available for young or shooters of smaller stature
 The ONLY auto-loading 410 here on the market

MODEL 332

HISTORY

Introduced 2002

Derives from 70 years of tradition in producing Over-Under shotguns

Styling and balance taken directly from the legendary Remington Model 32, considered by many to be the best handling American made over-under ever produced

Features and Benefits

Frame machined from a solid billet of steel offers superior strength and longevity compared to investment cast frames.

Hammer forged barrels are strong, easily maintained, and built for durability

Locking leg design minimizes stress on the frame and is one machined piece (no welds, screws or fasteners to break)

MODEL 332

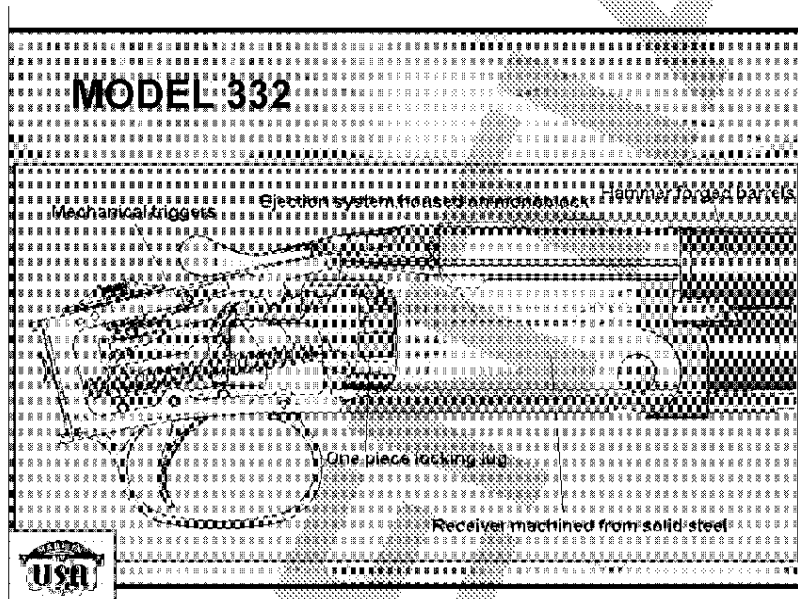

Ejection system is housed in the monoblock instead of the fore end. This minimizes the stress on the fore end iron and enhances reliability.

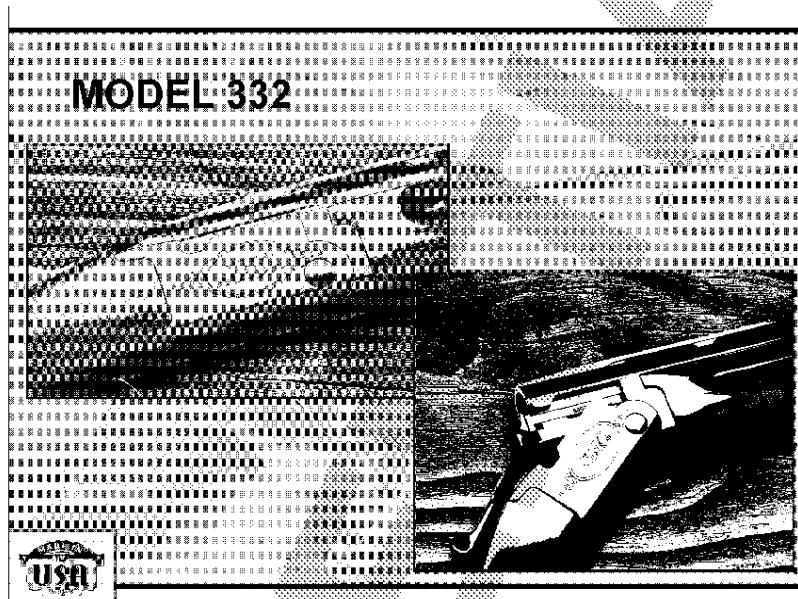

Stock dimensions are specially designed to minimize recoil and muzzle jump. The stock has no cast off to further improve recoil characteristics and please your left handed customers.

The 332's mechanical gear engagement switching mechanism does not rely on inertia or recoil to operate and is therefore more reliable than inertia triggers.

Consequently, this is an added benefit for shooters that choose to use Briley or Kotar sub gauge tube sets.

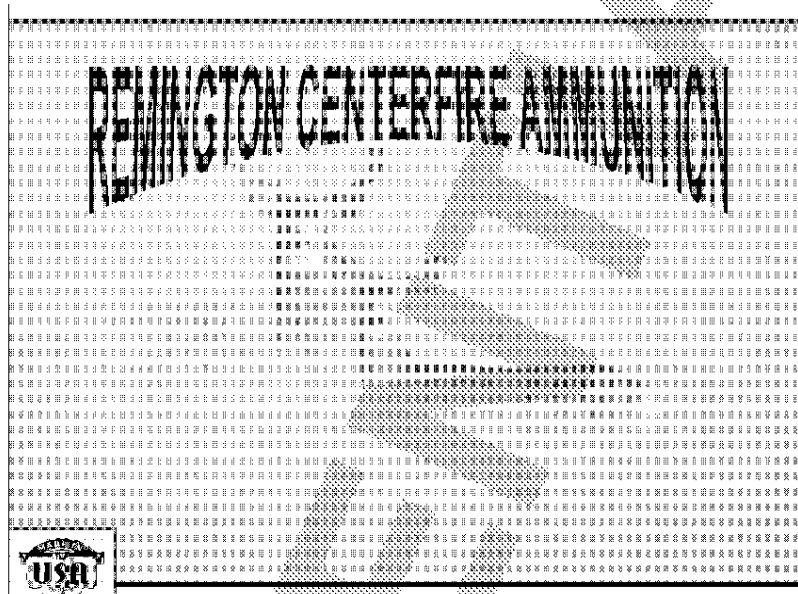

2005 NEW PRODUCTS - AMMO	
CENTERFIRE RIFLE	
Managed Recoil - 308 Win. & 300 Win. Mag.	
Premier Accu-Tip (New Varmint Loads)	
Premier Core-Lokt Ultra (New Calibers and Loads)	
Premier Match (223 Rem., 308 Win., 6.8 Rem. SPC., 300 Win. Mag., 300 Rem. SAUM)	
RIMFIRE	
Premier Gold Box rimfire (.17 Mach 2)	
SHOTSHELL	
Buckhammer Lead Slug Loads (New 12 ga. Mag. & 20 ga. Loads)	
Buckhammer Managed Recoil Slug Loads	
Nitro Pheasant Loads	
Shur Shot High Base Pheasant	
Gun Club Target Loads (New 12 ga. loads)	
Premier S&S Low Recoil Target Loads (12 ga. #9)	

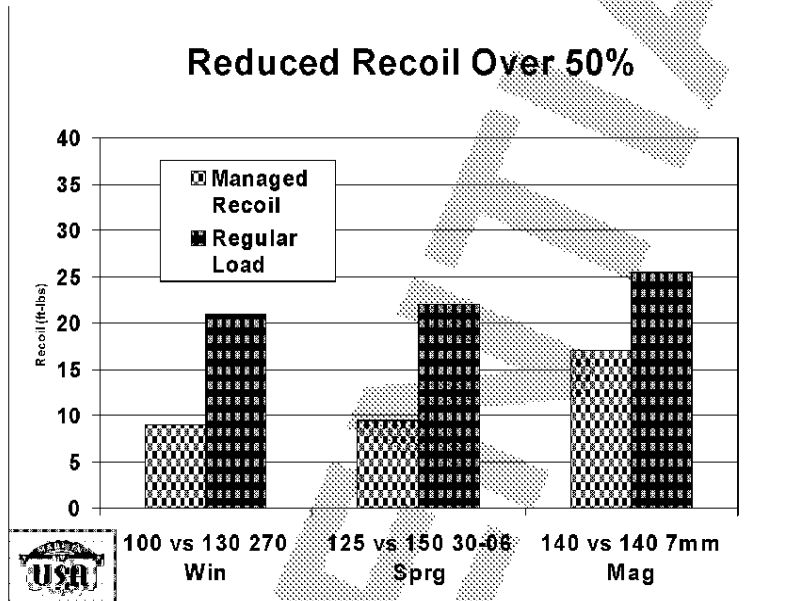

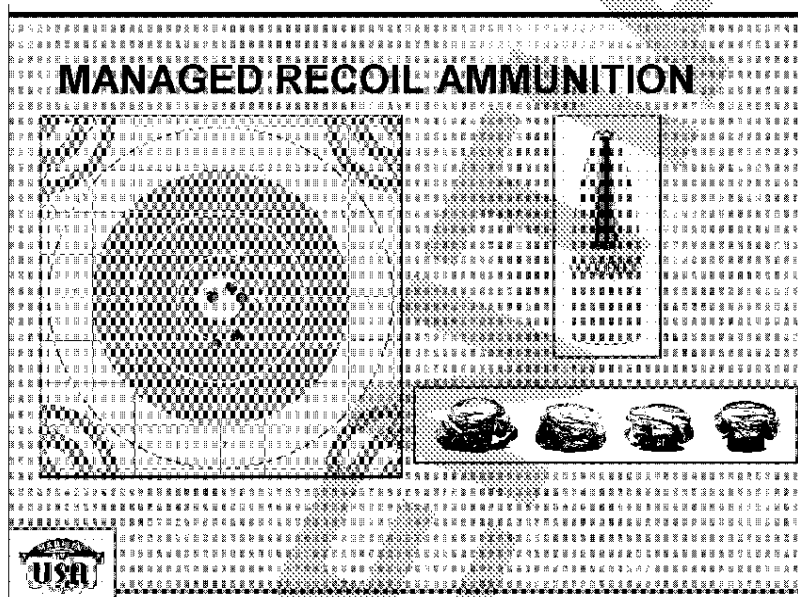

MANAGED RECOIL AMMUNITION

- Makes shooting more enjoyable
- Allows shooters to concentrate on the shot instead of the anticipated recoil
- Encourages people to shoot more often for increased confidence
- Encourages parents to introduce the next generation to the shooting sports
- Utilizes specialized bullets that are designed for 2x expansion and 85%+ weight retention

Available in .270, .308, 30-06, 7mm Rem Mag, and 300 Win Mag

PREMIER CORE-LOKT ULTRA

- Remington R&D designed using the latest in bonded bullet technology
- **Features and Benefits**
 - **Accuracy**
Results from perfect jacket thickness and concentricity
 - **Weight Retention**
Bonded bullet technology gives your customer an average of over 85% weight retention on even the toughest game
 - **Reliable Expansion**
Computer engineered jacket design and bonded bullet technology give your customer an average of 1.6X diameter expansion over a broad range of distances

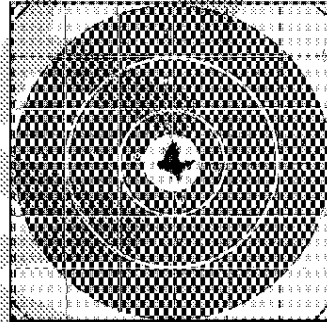

PREMIER CORE-LOKT ULTRA

New jacket design is 20% heavier and features a new wall profile to optimize expansion over a wide range of velocities

A 50% thicker Core-Lokt section maintains bullet integrity by better controlling and limiting expansion at higher velocities

Proprietary manufacturing process eliminates jacket stretch for near-perfect wall thickness and concentricity

Remington's Bonded bullet technology insures ideal expansion and 65%+ weight retention

PREMIER AccuTip

- The ultimate medium sized game bullet
- **Features and Benefits**
 - **Accuracy:**
The gold polymer tip, boat tail base, and proprietary jacket design make this the most accurate polymer-tipped bullet on the planet.
 - **Reliable Expansion:**
This bullet is designed to offer instant, devastating expansion at the point of impact.
 - **Weight Retention:**
AccuTip bullets feature an innovative ring near the base of the bullet that prevents jacket/core separation and results in the best Average Weight Retention in its class.
Average 65% weight retention through water into a steel plate vs. 35% from the nearest competitor.

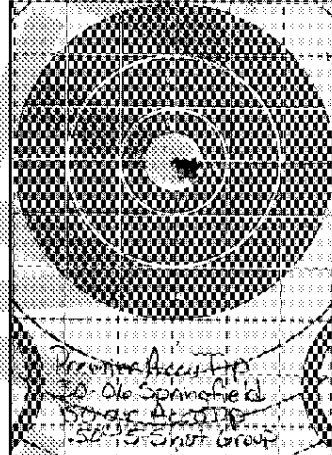

PREMIER ACCUTIP

Gold polymer tip provides high ballistic coefficient and initiates rapid expansion upon impact

Jacket designed for controlled expansion on game

Boat tail base reduces drag and contributes to both the flat trajectory and accuracy of the Accutip

Special ring near the heel of the bullet helps prevent over expansion and aids weight retention

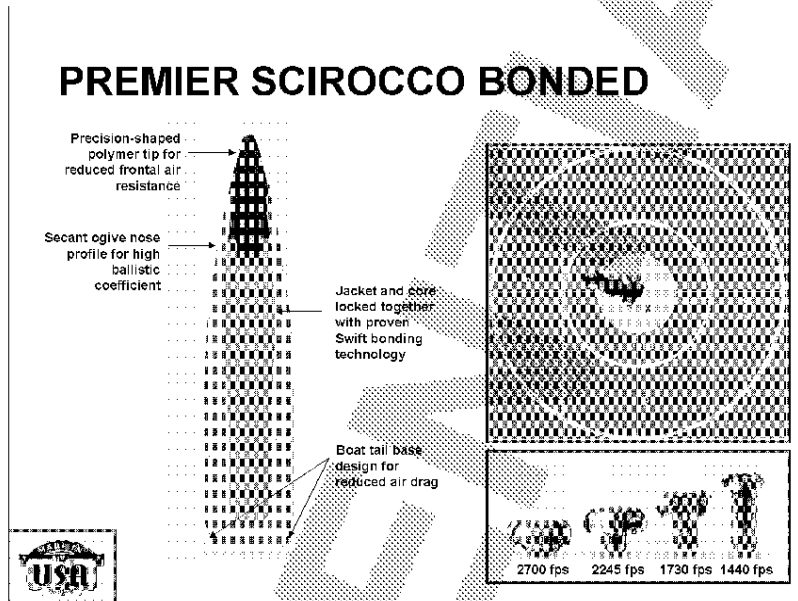

PREMIER SCIROCCO BONDED

- The original bonded polymer-tipped bullet
- A Remington exclusive

• Features and Benefits

- Accuracy:
 - Precision formed polymer tip and boat tail base combine with our consistent loading process for match grade accuracy
- Reliable Expansion:
 - The polymer tip initiates instant 2x expansion upon impact
 - The specifically designed jacket controls the expansion to allow good penetration
- Weight Retention:
 - The jacket and core are locked together using Swift's proprietary process, guaranteeing optimal weight retention

PREMIER MATCH

- Remington Premier Match Ammunition was introduced to provide Sub-MOA Accuracy.
- Factory ammunition suitable for competition, law enforcement, and military.
- Features the Sierra MatchKing bullet, the standard by which all others are judged.
- Proprietary bullet manufacturing processes insure absolute consistency.
- Stringent loading methods guarantee your customer lot-to-lot consistency and accuracy.
- Available for 2004 in:
 - 243 Rem. 6.5
 - 6.8mm Rem SPC 115 gr MatchKing
 - 308 Win. 168 gr MatchKing
 - 300 Win Mag. 190 gr MatchKing
 - 300 Rem. Mag. 190 gr MatchKing

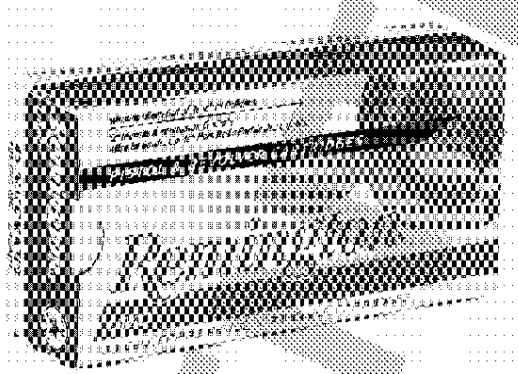

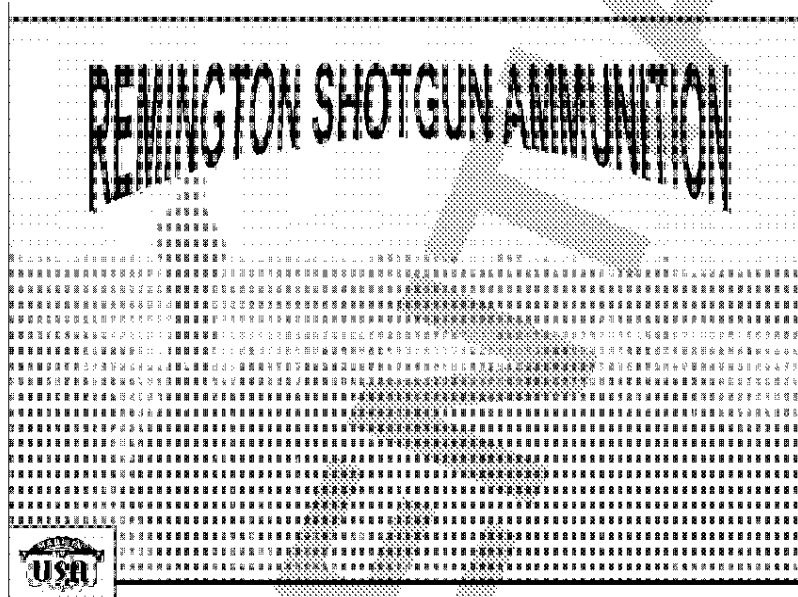

REMINGTON UMC AMMUNITION

- Union Metallic Cartridge
- High quality, value priced ammunition
- Made from all new components.
- Held to the same stringent quality standards as Remington Gold Box ammunition
- Available in a wide range of centerfire pistol/revolver and centerfire rifle calibers
- UMC Leadless available for the ultimate in indoor shooting safety.

NEW REMINGTON-UMC PACKAGING

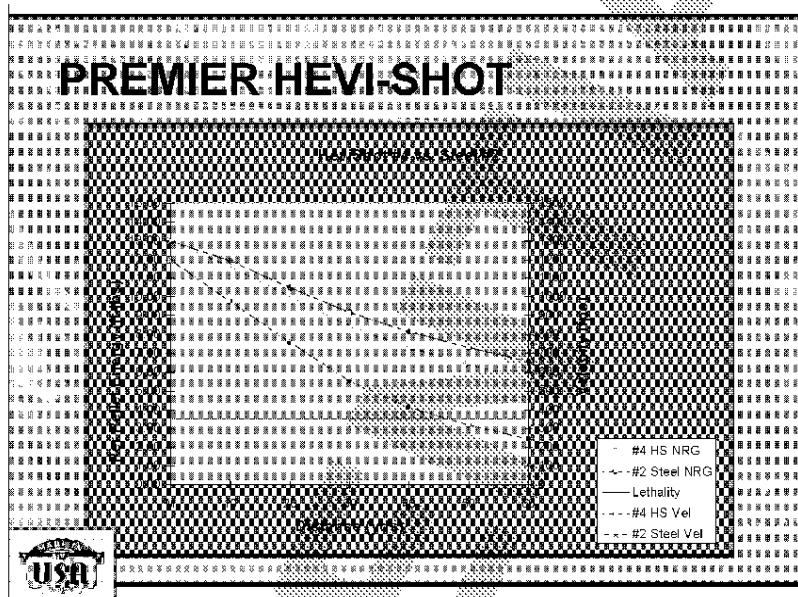

PREMIER HEVI-SHOT

- Non-Toxic alloy of Tungsten, Nickel, and Iron. (50/357/15)
- **Features and Benefits**
 - "Accuracy"
 - Patterns up to 18% tighter than steel
 - Patterns up to 25% tighter than lead
 - **Reliability/Strength**
 - More per pellet energy than any other ammunition on the market
- **Difference between Waterfowl and Turkey Hevi-Shot**
 - Bird on the box
 - Extra sealant on primer of waterfowl shells
- **Is Hevi-Shot safe for my barrel?**

PREMIER CORE-LOKT ULTRA BONDED SABOT SLUG

- The only slug available that features Remington's proprietary bonding process
- Ultra-high velocities
- Flattest trajectory of any slug on the market
- Average of 1-8" group size at 100 yards
- Reliable 2x expansion at a wide range of terminal velocities
- Available in 12 gauge (385 grain) and 20 gauge (260 grain)
- This is *literally* a 150 yard slug.

BUCKHAMMER SABOT SLUG

- The newest member of Remington's industry leading line of shotgun slugs
- Utilizes Remington's newly developed and patented Slug Stabilization System
- 3 or better groups at 100 yards
- 13% more energy than any other lead slug on the market
- 1 1/4 ounce lead projectile gives near 100% weight retention
- Expands to over 1 inch in diameter upon impact

PREMIER STS AND NITRO 27 TARGET AMMUNITION

- STS: Skeet, Trap, Sporting Clays
- Features the only one-piece, compression formed hull on the market
 - Gives up to 4 times the amount of reloads versus the nearest competitor
- The most consistent factory target ammunition available
- New Nitro 27 loads feature a new wad and specially blended powders for the lowest recoil of any high powered target loads
- Low recoil 20 gauge loads for O/U and S/S
