

Remington's Model 700™ EtronX™ Centerfire Rifle:

THE FASTEST, MOST ACCURATE

IGNITION SYSTEM EVER DEVELOPED.

Here's how the Model 700™ EtronX™ works: the electronic fire control has no moving parts other than the trigger. No wear to be released. No firing pin to strike the primer. Instead, an internal electrical circuit sends a charge through the system to our new electronically responsive primers. Closing the bolt on the cartridge establishes contact between the firing pin and the primer. When the trigger is pulled, the electronic circuit sends an electrical pulse through the firing pin directly to the primer. This all happens

in less than the blink of an eye. Ignition is even faster with near zero lock time (0.0000027 seconds actually), which virtually eliminates the effects of barrel movement after pulling the trigger. In fact, the bullet exits the barrel of an EtronX rifle before a mechanical firing pin could even hit the primer in a conventional rifle. The system also creates an exceptionally crisp trigger pull with 36% less travel than standard triggers. It gets even better: This entire ultra-advanced system is powered by a single, replaceable

nine-volt battery, located in the rifle's butt stock. What's more, a unique light-emitting diode on top of the grip indicates complete system status including whether the rifle is in FIRE or SAFE mode. Or if a cartridge has been chambered. Or if the battery is low. All the other aspects of an EtronX rifle match that of our famous Model 700 bolt-action rifle. It includes the same features as the revered Model 700 VSR with a stainless-steel action, 26" stainless fluted barrel, black synthetic stock and full-length aluminum bedding block.

SPECIAL OFFER: Purchase a Model 700™ EtronX™ Centerfire Rifle and Get \$250 CASH BACK or a FREE Case of EtronX Ammunition and 1,000 Reloading Primers.

For more coupons, please see the counter clerk for details or log on to www.remington.com to download a coupon.
