Dear Sir/Madam,

Thank you for your inquiry. We would need the serial numbers on your 2 Model 700's to determine the date of manufacture. We haven't had the bolt lock safety on our rifles since approx. 1985.

We recommend that you always follow the 10 commandments of shooting safety when in the field or at home. Please go to the following link for more information.

I purchased 2 new Remington 700 short-action rifles from Gart Sports about 2 years ago. They both have bolt locks (the bolt won't open with the safety on). I have read that this configuration was discontinued in 1982, but these guns were purchased new in 1999. Do you make them both ways?

Anyway, I have since had Ultra Light Arms (ULA) conversion kits installed which allows your safety to be used in 3 positions (safe w/bolt locked, safe with bolt open, and fire). The one thing I dislike about the safeties on both rifles is that walking through the brush sometimes flips the safety lever to fire. Are you working on a solution to this?
