Dear Mr. Eighmie,

Thank you for your inquiry. If you would like your firearm changed from a bolt lock safety to a non-bolt lock safety, we can do it for you in the factory, or you can take it to one of our Remington Authorized Repair Centers. There will be a charge for the replacement of the bolt lock safety. When we change the safety, we will install an entirely new trigger assembly that includes a non-bolt lock safety. Dear Sir,

You can locate your nearest repair center by visiting the Repair Information Center in our Support Section and selecting your model and state:

Can I alter or have altered the safety on my Remington 700 bolt action so that I can open the bolt without putting the safety in the firing position?
