Dear Mr. Strouse,  
Thank you for your inquiry. We will need to know the serial number and model number of your firearm in order to properly answer your inquiry. We do have a voluntary Safety Modification Program on certain model bolt action rifles. You can find more information regarding this program through the front page of our website or through the link below:

[http://www.remington.com/safety\\_modification\\_program/remington\\_safety.htm](http://www.remington.com/safety_modification_program/remington_safety.htm)

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first-time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you need a replacement copy of your Remington owners manual, or safety booklet, you can download or request a copy from the support section of our web-site.

Owners manuals - <http://www.remington.com/whatsnew/readroom.htm>

Safety Booklet - <http://www.remington.com/pdfs/sftybklt.pdf>

You may also obtain a copy by calling toll free 1-800-243-9700, and pressing option 1.

I heard on the news today that all Remington bolt action centerfire rifles had been recalled. I was wondering weather there was any truth in this and how to see if my rifle has been recalled and what to do about it.
