

Rem bolt gun recall

Discussion Thread

Response (Laura) 3/8/2002 10:44:19 AM

Dear Mr. Whidden,
Thank you for your inquiry. According to the serial number provided, this firearm was manufactured in or around 1979.

We have a Safety Modification Program on certain model bolt action rifles. This is a voluntary program, it is not a recall. This is designed to remind people of the existence of the bolt-lock feature and to offer customers the opportunity to modernize their products.

You can read more information regarding our firearms and our Safety Modification program through the front page of our website or the link below:

http://www.remington.com/safety_modification_program/remington_safety.htm

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you have any questions, please feel free to contact us at 1-800-243-9700 or 1-877-387-6691.

I have a 700 varmit special SN A6743032. Is it part of the recall I saw on the National News last night?
can you tell me when this weapon was made?
Harry B. Whidden
Jacksonville, FL.
