Dear Mr. Lim,

Thank you for your inquiry. We have a safety Modification Program on certain model bolt action rifles. This is a voluntary program, it is not a recall. This is designed to remind people of the existence of the bolt-lock feature and to offer customers the opportunity to modernize their products.

You can read more information regarding our firearms and our safety Modification program through the front page of our website or the link below:

[http://www.remington.com/safety\\_modification\\_program/remington\\_safety.htm](http://www.remington.com/safety_modification_program/remington_safety.htm)

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you have any questions, please feel free to contact us at 1-800-243-9700 or 1-877-387-6691.

On March 7, 2002, I viewed on CBS News a general re-call on Remington bolt action rifles that were manufactured in 1982. The Remington Model 700(serial #: A6431286) .308 bolt action rifle that I own, I had purchased in 1979. Are bolt action rifles made before 1982 included in this re-call, or does this re-call only affect those made in 1982?

Al Lim
