Dear Kyle,

Our older records only indicate the date of manufacture which is in or around 1971. It does not have specific details regarding each model. We are currently offering a Safety Modification Program on older Model 700 rifles with the Bolt Lock Safety. You can read more information regarding this program through the front page of our website. As with any used firearm, we would strongly recommend you have the firearm serviced and evaluated by a competent gunsmith for function and safety. We feel it is imperative you know the exact condition of your firearm prior to shooting. Please also read our "Guide to Buying a Used Gun" found through the link below:

<http://www.remington.com/magazine/preview/rc007007.asp>

If you are not aware of a gunsmith in your area, please feel free to contact one of our RARC's found in the Support/Repair section of our website or the following link:

<http://www.remington.com/repairsvc/modelselection.asp>

If you will complete the form located in the What's New/Reading Room section of our website, we will forward to you a copy of the original owner's manual.

<http://www.remington.com/whatsnew/readroom.htm>

You can also find owner's manuals for some of our current models on-line in our Reading Room in the "What's New" section.

I bought this gun a couple of weeks ago. It has a .22-250 Remington heavy bull barrel on it. Can you tell me what year this gun was made? If it is a BDL, ADL, etc..? Is this the original caliber it was chambered for? If a bull barrel came stock on this action, what countour was it?
