I had my 600 worked on at valley gun shop, 7719 Harford Road, Baltimore Md21234 410-668-2171 for the saftey modification program of the bolt lock problem. The article in the North American Hunting Club magazine stated that there would be no charge for this work. I called this morning to see if my rifle would be ready. It was but there is a 20 dollar charge. Are they billing me and Remington? Thank You! John Kerner, Baltimore Maryland
