Dear Mr. Epperly,
Thank you for your inquiry. We have a Safety Modification Program on certain model bolt action rifles. This is a voluntary program, it is not a recall. This is designed to remind people of the existence of the bolt-lock feature and to offer customers the opportunity to modernize their products. If you have a bolt lock safety, we strongly recommend that you take advantage of this offer.

You can read more information regarding our firearms and our Safety Modification program through the front page of our website or the link below:

My rifle is a 222.I understand there is a problem with the "safety" on the Remington model 700. Please furnish me with ALL information regarding this problem.

such as:

1. Does the problem exist with this rifle?
 2. If you cannot tell me if I have the problem from the above serial number, how do I determine if the problem exists?
 3. If the problem exists on this rifle, how do I go about correcting it?
 4. I could not find this information from your pages.
- Thank you
