Dear Mr. Nerviani,  
Thank you for your inquiry. We are offering a Safety Modification on certain bolt action rifles including older model 700 rifles. This is a voluntary program, it is not a recall. This is designed to remind people of the existence of the bolt-lock feature and to offer customers the opportunity to modernize their products. We strongly recommend that you take advantage of this offer.

You can read more information regarding our firearms and our Safety Modification program through the front page of our website or the link below:

[http://www.remington.com/safety\\_modification\\_program/remington\\_safety.htm](http://www.remington.com/safety_modification_program/remington_safety.htm)

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you have any questions, please feel free to contact us at  
1-800-243-9700 or 1-877-387-6691.

I was advised from a T.V. bulletin that some Remington Bolt action rifles built before 1982 may have a problem with their safety? I own a 1971 Model 700 BDL (6mm caliber) rifle and was wondering if I need to be concerned with this issue. Thanks.
