Dear Sir,

According to the information provided, it appears this firearm was manufactured in or around 1964. We currently have a Safety Modification Program on certain model bolt action rifles including older model 700 rifles manufactured before 1982. This is a voluntary program, it is not a recall. This is designed to remind people of the existence of the bolt-lock feature and to offer customers the opportunity to modernize their products. If you have a bolt lock safety, we strongly recommend that you take advantage of this offer.

You can read more information regarding our firearms and our Safety Modification program through the front page of our website or the link below:

http://www.remington.com/safety_modification_program/remington_safety.htm

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you have any questions, please feel free to contact us at 1-800-243-9700 or 1-877-387-6691

Around 1966 or 1967 I purchased the following Model 700 from an individual.

Can you tell me when it was made?

Model 700 bolt action rifle

30-06 Springfield

Serial # PLG 108995 (The letter I read as a G could be a C.)
