Dear Mr. Dufresne,

We have not had any problems with our pump action shotguns either. If you are speaking of the Safety Modification Program that we are currently having on our Bolt action rifles, you can read more information regarding that program through the front page of our website at www.remington.com.

I tried to reply between the lines but was not able to?

Perhaps I didn't recall the model correctly. Have you had a problem with misfires on the pump guns?

What I heard was that some Remington firearm was firing when the action was cycled, without pulling on the trigger.
