Dear Charlie,

With proper shot placement, we recommend using 100 gr. Pointed soft point Core-lokt or 100 gr Pointed Soft Point Boat tail. For the 308, 150 gr. Pointed soft point Core-Lokt should work well on this application.

We also want to make you aware of a recall on certain Model 600 rifles. You can find more details regarding this recall through the front page of our website or through the link below:

My son wishes to use my .243 model 600 mohawk for deer hunting. What ammo do you recommend for Virginia size deer? Range will be under 200 yards.

Also, what do you recommend for a 20" barrel .308 for the same hunting?

thanks

charlie
