I sent two (2) model 700 rifles to you via UPS to have the safety modification done. UPS tracked the shipment and they were received on September 30th. It is now the 8th of October and I have had no phone call or email regarding them. Please contact me ASAP so that I may confirm that you have received my shipment, how long it will take for the service to be done, the total cost to me, payment instructions, and when I can expect to have my rifles back.
