Dear Mr. Thomas,

Thank you for your inquiry. We regret that your firearms were stolen. There has not been a recall on any of these firearms. We are offering a safety modification program on certain bolt action rifles. We do not show a record of having received your model 721's in the past few years for repair. As far as your Model 788, we recommend taking or sending your firearm to a Remington Authorized Repair Center or our factory for evaluation.

You can locate your nearest repair center by visiting the Repair Information Center in our Support Section and selecting your model and state:

I understand the Mod. 721's were on a re-call for safty repair. I've had these two stolen and wonder if there is anyway to see if someone has taken them in for the repairs?  
also I have a Mod. 788 22-250 that's safty is a lot more UNSafe then either one of the Mod. 721s, is it on a re-call as well?
