Dear Mike,

According to the serial numbers provided, 6749486 was made in or around 1974. B6467661 was manufactured in or around 1983. We want to make you aware of a Safety Modification Program that we are offering on certain model bolt action rifles. This is a voluntary program, it is not a recall. This is designed to remind people of the existence of the bolt-lock feature and to offer customers the opportunity to modernize their products. If you have a bolt lock safety, we strongly recommend that you take advantage of this offer.

You can read more information regarding our firearms and our Safety Modification program through the front page of our website or the link below:

http://www.remington.com/safety_modification_program/remington_safety.htm

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you have any questions, please feel free to contact us at 1-800-243-9700 or 1-877-387-6691.

Response (Laura) - 10/30/2002 01:46 PM

Dear Mike,

We will need to know the serial number of your firearm to determine when it was manufactured.

Customer (Mike Tanner) - 10/27/2002 04:56 PM

How can I tell the year that my model 700 was made?
