Dear Mr. Witthohn,
Thank you for your inquiry. According to the information provided, your firearm would be included in a recall. You can find all the details regarding this through the front page of our website or through the following link:
http://www.remington.com/Safety_Modification_Program/xp100.htm.

We suggest contacting a Remington Authorized Repair Center for this work. You can locate your nearest repair center by visiting the Repair Information Center in our Support Section and selecting your model and state:

I recently acquired a used XP-100 in .221 Fireball. The other day when I was at the range, I was advised by the range officer that there had been a recall on the XP-100 because some part of the trigger assembly would come loose and the gun would not fire but if the gun was tipped forward, it would then go off. I would appreciate it if you would advise me what should be done to make sure this problem is corrected. Thank you for your assistance. Robert E. Witthohn
