Dear Paul,

Thank you for your inquiry. We offer the 7mm SAUM in the Model Seven line of rifles. You can view these models in the What's New section of our website. If you will contact our parts & repair department at 1-800-243-9700 with the serial numbers of your firearms, we can assist you with your questions regarding the Safety Modification Program.

In 7mm SAUM, what rifle models are available? Also are any serial numbers available in the 700 and XP100 firearms bolt action safety modification program?
