Dear Mr. Goodwin,  
Thank you for your inquiry. We are offering a Safety Modification on certain bolt action rifles including the Model 722. This is a voluntary program, it is not a recall. This is designed to remind people of the existence of the bolt-lock feature and to offer customers the opportunity to modernize their products. We strongly recommend that you take advantage of this offer.

You can read more information regarding our firearms and our Safety Modification program through the front page of our website or the link below:

[http://www.remington.com/safety\\_modification\\_program/remington\\_safety.htm](http://www.remington.com/safety_modification_program/remington_safety.htm)

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you have any questions, please feel free to contact us at 1-800-243-9700 or 1-877-387-6691.

Customer (Travis Goodwin) 11/18/2002 5:05:12 PM

My father-in-law has the above rifle. I have used it some for target and varmint hunting. I was recently told there might have been (in the past) some type of recall or TSB about getting the gun converted so the safety can be engaged when unchambering a round. Could you tell me any more information about this, and if so, is there a Remington approved or certified gunsmith nearby where I could get the work done? (I live in Indianapolis, Indiana.) I would pay if necessary, just would like to see both the gun and my in-law enjoy many more years of shooting in safety. Thanks for any information you can provide.

Sincerely,  
Travis Goodwin
