Dear Mr. Davidson,
Thank you for your inquiry. We would need to know the serial number of your firearm to determine if there has been a recall on your rifle. You can find all of the details regarding the Model 600 recall as well as determining if yours is included or not through the front page of our website at www.remington.com or through the following link:

http://www.remington.com/Safety_Modification_Program/remington_safety.htm

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you have any questions, please feel free to contact us at 1-800-243-9700 or 1-877-387-6691.

I have just read in a magazine add you are recalling the model 600 and 700 to change the safety. I also read in the add in 1979 the trigger assembly was recalled in the 600. How can I repair my firearm?
