Thank you for your inquiry. We have not issued a recall on the Model 700. We are, however, offering a bolt-lock safety modification program on the Model 700. I have provided a link below for more information on this program.

[http://www.remington.com/safety\\_modification\\_program/remington\\_safety.htm](http://www.remington.com/safety_modification_program/remington_safety.htm)

I hope that this information is helpful. Thank you for your continued support of Remington products and thank you for visiting Remington Country!

I have an older vintage model 700, 30-06 (mid-1960's if my memory serves me correctly). A friend told me that Remington had issued a recall on the bolt for that model because there have been misfires when loading. Does this rifle fall into the recall criteria? And, if so what steps do I have to take to respond to the recall?

Charlie Heaton
